

E-Z Spike™ E-Z Post Base Spike

Mounting 90mm posts is easy with the E-Z Spike

SIMPSON
Strong-Tie®

Fence Posts

Letterboxes

Simply hammer in and add fasteners

The E-Z Spike is part of a Simpson Strong-Tie® line of products designed to help make reinforcing fence posts simple and economical. The E-Z product line offers solutions for a variety of fence post projects. This post base allows for easy installation of 90 x 90mm wood posts without digging holes or pouring concrete.

Features and Benefits

- Can be used where quick-to-install posts are needed, including fencing and mailbox applications
- Black powder-coated steel construction for reliable strength and decorative finish
- Approved for installation with Strong-Drive® 6.4mm x 38mm SDS Connector screws

Applications

- Fences, mailboxes, etc.

Material and Finish

- 2.6 mm thick steel — Black powder coat finish.
- Please see Resources>Corrosion on our website for information if suitable for your application.

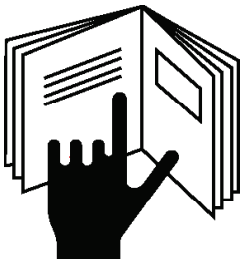

E-Z Spike™ E-Z Post Base Spike

Mounting 90mm posts is easy with the E-Z Spike

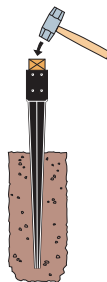

Typical Installation

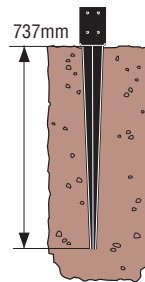

1. Check local building department for any applicable code requirements and contact Before You Dig Australia.

2. Drive spike base into the ground using a short block. (Be sure to use a block smaller than the actual post.) For best results, turn the block every few strikes. Take care to install spike base plumb.

3. E-Z Spike should be driven 737mm into the ground for full penetration.

4. Attach post to spike base using (8) Simpson Strong-Tie® Strong-Drive® 6.4mm x 38mm SDS Heavy-Duty Connector screws.

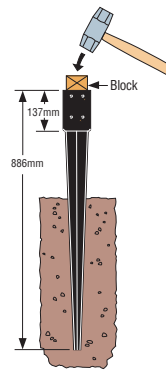

Warning

The E-Z Base and E-Z Spike products should not be used for solid fences in excess of 1.2m in height or that are unprotected from wind forces. These products are not rated for uplift loads, and should not be used with posts for overhead structures or any other structure that requires resistance to wind uplift loads. Notwithstanding the terms of the Limited Warranty, Simpson Strong-Tie does not guarantee, represent or warrant that this product will prevent or reduce damage caused by corrosion, or any seismic, wind, atmospheric, or other load-producing event.
