

410 Grade Stainless Steel Screw For Cladding And Deck Clip Systems

The self-drilling siding screw is designed for attaching wood siding, wood panels and metal trim to steel studs. These screws are made from heat-treated Type 410 stainless steel.

Features and Benefits

- Trim head for less noticeable installation.
- Durable black painted head
- Fine Threads.
- #3 drill point.
- #1 square drive (requires bit model BIT1S-2-R2).

Applications

- Attach timber siding, timber panels and steel trim to steel studs
- Steel Frame
- Recommended steel thickness 0.8mm – 2.4mm
- Max Grip Length - 29.7mm. Note: Grip length includes side member, steel thickness, air gap (if any) and allowance for three threads protruding through the steel.

Material

- Type 410 stainless steel
- Corrosion Resistance Level**
LOW
- NOTE: Type 410 stainless steel can be hardened through heat treatment, giving it the ability to drill through metal. It does not offer the same level of corrosion resistance as either Type 316 or Type 305 stainless steel.

Trim head

For less noticeable installation in siding and deck clips

Fine threads

19TPI & Fully threaded for holding power in steel frame

#3 Drill Point

Drives easily through 0.8–2.4 mm steel

Deck-Drive™ F07 SIDING & DECK CLIP-TO-STEEL Screw

Applications:

Decking Clips

Cement cladding (siding) to steel

Timber cladding (siding) to steel

Warning: Hardened stainless-steel fasteners should not be used with steel framing in environments with high humidity, condensation or other moisture that will be present at the dissimilar-metal interface
