Fencing

Fasten projects up to 4X faster!

**Introducing an exciting new way to complete your projects. The Simpson Strong-Tie® Project Pro screw driving tool provides a versatile solution that makes fastening faster, safer and easier.**

## Features & Benefits

- Auto-feed technology drives screws repeatedly – just point and drive.
- Fits most cordless drills or impact drivers.
- Simple to use – less experienced users can work quickly and efficiently.
- No fumbling and dropping screws.
- Project Pro™ is compatible with industry-leading Quik Drive® premium collated fasteners.

**Fasten projects up to 4X faster!\***

**Simpson Strong-Tie Limited Warranty:** For the Limited Warranty that applies to Simpson Strong-Tie products, please consult [www.strongtie.com.au/warranty](http://www.strongtie.com.au/warranty) or [www.strongtie.co.nz/warranty](http://www.strongtie.co.nz/warranty). To obtain a copy of the Limited Warranty, contact us at [info.au@strongtie.com](mailto:info.au@strongtie.com) or [info.nz@strongtie.com](mailto:info.nz@strongtie.com), or at the number provided here. The Limited Warranty contains important disclaimers, limitations and exclusions, and applies only if the products have been properly specified, installed, maintained, and used in accordance with the design limits and the structural, technical, and environmental specifications in the Simpson Strong-Tie Documentation. All future purchases of Simpson Strong-Tie products are subject to the terms of the Limited Warranty in effect as of the purchase date.

# Quik Drive Project Pro™

Screw Driving Tool

## Typical Installation

**STEP 1:** Attach the tool to your driver motor of choice. Insert into driver chuck and tighten.

**STEP 2:** Adjust length of stabiliser arm as needed. Affix strap around battery so that the strap is in line with battery. Tighten stabilizer arm.

**STEP 3:** Insert Quik Drive® collated fastener strip. Push "arrow point" end in first until it clicks in place.

**STEP 4:** Pull the trigger and then push down on the driver motor and tool until the screw head is seated. Test into scrap material to set the proper depth.

Note: Detailed instructions and troubleshooting steps are detailed in the Operator's Manual
