# **DTH** — Trim Head Screw (Collated)

### Material

Carbon Steel

## Finish

Class 3 Mechanically Galvanised

Corrosion Resistance Level

Size: See the table below

### Features & Benefits

- No pre-drilling required
- Trim Head with Nibs for clean and less noticeable finish
- Type-17 Point enable easy driving with no predrilling and minimal splitting
- Coarse Threads
- #2 undersized square drive

## **Applications**

• Timber-to-Timber

**Trim Head** with Nibs ideal for a less noticeable fixing

Coarse Threads for faster installation

Type-17 Point ideal for timber applications

Quik Drive®

### Specifications - Quik Drive® Collated

Model No.	Size	Thread	Point	Material & Finish	Box Qty	Drive Size	Replacement Bit
DTHG2SA	8G x 50mm	Coarse Threads	Type-17 Point	Carbon Steel Class 3 Mechanically Galvanised	2000	#2 Undersize Square Drive	BIT2SU-RC10

These coated fasteners possess a level of corrosion resistance that makes them suitable for use in some exterior and corrosive environments and with some preservative-treated timber. For applications in higher-exposure applications, consider Type-300 series stainless-steel fasteners for superior corrosion resistance. Bit(s) included with every box of screws. Pre-drilling and countersink may be necessary at ends, butt joints, and on applications where denser material is used. Follow board manufacturers recommendations where applicable.
