SCN — Smooth-Shank Connector Nail (Collated & Loose)

Material: Carbon Steel

Finish: Hot-Dip Galvanised

Corrosion Resistance Level

Size: See the table below

Features & Benefits

- Full round head with embossed size identification
- · Smooth shank makes for easier driving
- Diamond Point provides lower driving resistance
- Collated version with orange tips and 33° collation angle help with quick alignment through CCN64 Collated Connector Nailer
- Paper tape strip, 22 nails per strip

Applications

- Simpson Strong-Tie® Connectors
- This nail is available for both hand-drive and CCN64 Collated Connector Nailer.

Head Stamp for easy nail identification

Smooth Shank makes for easier driving

Diamond Point provides lower driving resistance

Specifications - Hand Drive

N10DHDGPT500		64mm x 3.75mm						500
N10DHDGPT2500								2,500

These coated fasteners possess a level of corrosion resistance that makes them suitable for use in some exterior and corrosive environments and with some preservative-treated timber. For applications in higher-exposure applications, consider Type-300 series stainless-steel fasteners for superior corrosion resistance. Bit(s) included with every box of screws. Pre-drilling and countersink may be necessary at ends, butt joints, and on applications where denser material is used. Follow board manufacturers recommendations where applicable.
