

WSC — Flooring Screw (Collated)

Material

Carbon Steel, Yellow Zinc

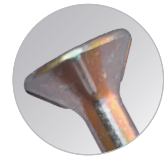

Size: See the table below

Features & Benefits

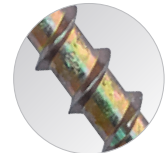

- Flat Head with Nibs for easy countersinking
- Coarse Threads
- Type-17 Point ideal for timber applications
- #2 Square Drive

Applications

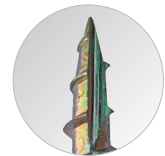

- Timber-to-Timber
- Timber Flooring

Flat Head with Nibs for easy countersinking

Coarse Thread ideal for timber applications

Type-17 Point ideal for timber applications

Quik Drive®

Specifications - Quik Drive® Collated

Model No.	Size	Thread	Point	Material & Finish	Box Qty	Drive Size	Replacement Bit
WSC114SA	8G x 32mm	Coarse Threads	Type-17	Carbon Steel Yellow Zinc	2500	#2 Square Drive	BIT2S-RC10

These coated fasteners possess a level of corrosion resistance that makes them suitable for use in some exterior and corrosive environments and with some preservative-treated timber. For applications in higher-exposure applications, consider Type-300 series stainless-steel fasteners for superior corrosion resistance. Bit(s) included with every box of screws. Pre-drilling and countersink may be necessary at ends, butt joints, and on applications where denser material is used. Follow board manufacturers recommendations where applicable.
