

PRO250 — Quik Drive® Auto-Feed Screw Driving System

Save Time and Money with Faster Installation Speeds and Consistent Performance

The PRO250 Quik Drive® Auto-Feed Screw Driving System is ideal for, but not limited to, underlay, subfloor, sheathing and decking applications. Designed to drive 40mm – 65mm (8 – 10 gauge*) screws the PRO250 is a truly flexible tool to cater for a wide range of applications. Incorporating a precision countersink adjustment that produces consistent screw depth, combined with the auto-feed mechanism delivers fast, hassle-free driving on the jobsite.

* 12g Deck-Drive™ DHS D HARDWOOD Screw is the exception

Features & Benefits

- Reversible and replaceable non-skid teeth
- Rigid strip collation prevents jamming
- Sure-grip guide tube increases stability for a wide range of screws
- Adjustable depth setting for perfect countersinking
- Expanded depth settings for high-density flooring materials
- Extension Pole enables stand-up driving to save time and reduce worker fatigue
- Can be used with or without the Extension Pole
- QuikLock™ coupling allows for easy assembly and disassembly so system can be used without the Extension Pole
- Built-in bit wrench makes bit changes quick and easy

QDPRO250G2IK Includes

- PRO250 Attachment
- Extension Pole
- Rugged toolbox
- Adaptors: MAA3G2, HIAG2 (Suit Makita® FS2300, Hitachi® Screwguns)

For more adaptors, information on screwdriver motors and RPM recommendations per application, please visit our website or contact Simpson Strong-Tie.

PDECKNC-RC (sold separately)
The decking nose clip positions the screw on the deck board and positions it over the joist for an easy, uniform installation from a standing position.
