

Quik Drive® Auto-Feed Screw Driving Systems

Reduce Time and Labour Cost — The Quik Drive® Advantage

Maximise your fastening efficiency on a broad range of applications from decking and siding to roofing and steel framing and everything in-between.

Simpson Strong-Tie's Quik Drive® Auto-Feed Screw Driving Systems feature quick loading yellow strip screws, precise countersink adjustment, and a patented auto advance mechanism. This enables you to improve the quality and speed of your work while reducing wastage and money spent on the job.

Features & Benefits

- Ergonomic and Health and Safety benefits — Extensions allow stand-up driving for appropriate applications, making work less stressful on the back, shoulders and knees
- Precise self-locking depth adjustments allow for consistent fastener drive depth
- Collated Quik Drive® fastener strips are engineered to hold screws away from the surface and not scratch the jobsite materials
- QuikLock™ coupling allows for easy assembly and dis-assembly
- Unique design limits jamming of the collated screw strip
- Easy to clean and maintain
- Large range of screws to suit a diverse range of applications
- Driver bit(s) supplied with every box of collated screws
- Compatible with most major manufacturers' screwdriver motors

Adjustable Countersink

The Quik Drive® Auto-Feed Screw Driving System features a countersink adjustment function that allows the user to adjust the driving depth of the fastener to ensure consistent fastener penetration based on the material and application.

Once the countersink depth is set the driver bit will automatically disengage from the head of the fastener once the desired penetration depth is achieved, thus preventing over-driving. With screws driven at the desired depth every time without the need to slow down or check each fastener you can work faster with more consistent results.

PDECKNC-RC (sold separately)
The decking nose clip positions the screw on the deck board and positions it over the joist for an easy, uniform installation from a standing position.

Look for the yellow strip. Your guarantee of quality and performance from **Genuine Quik Drive® Fasteners.**

Collated Strip Loading

The Quik Drive® Auto-Feed Screw Driving System reloads quickly by simply feeding (sliding) the rigid strip into the short channel until you hear a click. Every Quik Drive® collated screw strip has a pointed end so there is no doubt which way they are loaded.
